*We all are living very tough moments. We all are AFRAID. But there is another "F" word that is 100 times more powerful than fear. **FAITH.***

*Humans are **eternal optimists.** We fail, and then we try again. Most of the best athletes and companies in the world failed before they were successful.*

***Resilience and adaptation** are key.*

*Unfortunately, we cannot choose the right time for everything but what I know is that winter doesn't last forever. **Spring always follows.***

*And then, will you be prepared? Are you trained for future challenges? **In every crisis lies opportunity.** People who are successful are not lucky; they are just prepared for opportunities that come their way. **Anticipation is power.***

*As leaders we are, we all have a very strong part of us. Call that part of you that is hard, courageous and hungry and let's lead ourselves and others. Let's use all of our abilities to **lead others into optimism, courage, faith, strength and passion.***

*Leaders, take the time to strategize and envision new business models. Draw your map. Plan. Learn. Grow. **Empower yourself.***

***This is your time to prepare for what's ahead.***

***After all this happens,  
you will have taken your life to the next level.***
